

full range of subsystems for cube satellites and small satellites.

ÅAC Microtec, traded on Nasdaq First North Stockholm and its subsidiary Clyde Space offer a full turnkey mission service from design to on-orbit operations including reliable platforms in the range of 1 to 50 Kg; customizable to suit our customers' requirements. Our end-to-end service package enables our customers to reach their mission goals with a single, trusted point of contact. In addition, we supply a

ÅAC Microtec is expanding in Uppsala and therefore looking for a

Project Manager

Satellite Systems

We are looking for a skilled Project Manager to support our team in Uppsala to meet the rapidly growing customer demand for our satellite subsystems and products.

We offer a challenging and stimulating position as Project Manager in an exciting international company shaping the small satellite industry. We work in small cross-functional project teams which are used to work efficiently in close cooperation with each other and the customers and our engineers are characterized by being highly skilled and motivated people.

Key tasks and responsibilities include the planning, managing and reporting of time critical projects dealing with advanced technology for space applications. The projects typically involve advanced electronics and/or software development for embedded systems, so it is an advantage if you have a background in any of these fields or if you have worked in the space industry. You will also lead the contact with customers, partners and suppliers.

Your qualifications: University degree (MSc) or equivalent qualification in Engineering and 3-5 years of proven experience of project management in a technology environment. It is an asset if you have worked with PPS or a similar Project Management Model. To be successful in this role you need organized, communicative, people-oriented, efficient, able to prioritize and open to working with a variety of tasks in parallel. Fluency in English, both written and spoken, is mandatory. Finally, you are eager to be part of a team which is building a successful company in the forefront of small satellite development!
