

# freemelt

**Freemelt** has developed a new advanced 3D printer: Freemelt ONE. Freemelt's technology, Electron Beam Powder Bed Fusion (EPBF), is used for research and development of new materials which will contribute to new and improved products for a variety of industrial applications. Metal 3D printing is a business area growing by 30-40% per year. Freemelt AB is a Swedish deep tech startup founded by a team with extensive experience of additive manufacturing. We are about 10 employees located in nice facilities in Mölndal, Sweden. Read more at [www.freemelt.com](http://www.freemelt.com)

## Freemelt is expanding and is looking for a **Area Sales Manager** with passion for business and technology

**You have** a desire to work with complex technical sales and marketing at an international level. You enjoy interaction with qualified and demanding customers who challenge you. You want to make a difference, are passionate about introducing new technology and contributing to Freemelt's progress and success in the metal 3D printing industry.

**We offer** a free and independent position in an innovative team with cutting-edge expertise in our core technologies. Since Freemelt is a young and small company, you will have a great chance to influence and contribute to the development of a successful and export-oriented technology business.

**You have** a technical and/or commercial education combined with solid experience of technical sales in an international environment. You are comfortable at a technology-oriented workplace and understand the challenge of selling advanced technology. Your social situation allows 100-120 travel days per year and you feel at ease in different cultures. Fluency in English is expected, and other languages are of course meritorious.

For further information, contact our recruiter Peter Ternebring at Confidera Urval, +46 706 398 889, or Ulric Ljungblad, CEO at Freemelt, +46 734 840 012. Mark your application "Freemelt" and email it to
